PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience across the full software development lifecycle — design, development, testing, and deployment. Builds production applications with React, TypeScript, Node.js, NestJS, REST and GraphQL APIs, PostgreSQL, and AWS. Built agentic AI workflows using Claude API and Groq LPU that reduced operational overhead by 40%. Progressed from intern to full-time engineer within one quarter. Currently pursuing an MCA specializing in AI/ML.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, Redux Toolkit, React Query, Tailwind CSS, Material UI

Backend: Node.js, NestJS, Express.js, REST APIs, GraphQL, Prisma ORM, JWT / OAuth 2.0

AI/ML: Claude API, Groq LPU, Azure OpenAI, agentic workflows, RAG pipelines, prompt engineering

Databases & Cloud: PostgreSQL, MySQL, Redis, AWS (EC2, RDS, S3, Lambda), Docker, CI/CD, GitHub Actions

Testing & Tools: Jest, Supertest, Playwright (E2E), Git, GitHub, Postman, Jira, Agile/Scrum

WORK EXPERIENCE

Full Stack & AI Engineer — CreamCollar *Oct 2024 – Present*

Full-Time (progressed from Intern within first quarter)

- Built and deployed generative AI agents using Claude API and Groq LPU with agentic workflows, reducing operational overhead by 40% and enabling autonomous task execution with sub-second decision loops.
- Designed and built REST and GraphQL APIs with NestJS, TypeScript, and Prisma ORM, sustaining sub-200ms p95 response times across production services.
- Led frontend migration of a production storefront (product listing, cart, checkout, order management) to React, TypeScript, and Next.js, cutting page load time by ~35% through code splitting, lazy loading, and Core Web Vitals tuning (Lighthouse 90+).
- Implemented JWT and OAuth 2.0 authentication, role-based access control (RBAC), and third-party SSO integration across backend services.
- Integrated LLM-powered recommendations and automated content generation using Azure OpenAI, Claude API, and RAG pipelines, replacing previously manual content workflows.
- Automated E2E, unit, and integration testing with Playwright, Jest, and Supertest, reaching ~80% coverage on critical user flows and cutting production regressions.
- Deployed and maintained AWS infrastructure (EC2, RDS, S3, Lambda) with Docker containers and GitHub Actions CI/CD pipelines for zero-downtime releases.
- Designed PostgreSQL schemas, migrations, and indexing strategies; built stakeholder-facing dashboards and admin panels with Material UI and Tailwind CSS.

PROJECTS

Tec Tha — Multi-Agent AI Automation Platform *| Claude API, Groq LPU, Playwright, Prisma, Redis*

- Engineered a multi-agent AI orchestration framework with autonomous execution, hybrid Claude/Groq model routing for LLM reasoning, Playwright browser automation, and Redis-backed persistence.

GigaMed — Healthcare Ecommerce Storefront *| Next.js, Apollo GraphQL Federation, Redis, i18n*

- Built a multi-tenant healthcare marketplace serving 12+ regions with federated GraphQL, multi-region SSO, RBAC, real-time Redis-cached inventory, and dynamic locale switching with localized forms.

VOXA — Personal Finance Expense Tracker *| NestJS, PostgreSQL, Stripe, Razorpay, Tesseract OCR*

- Developed an expense tracker with dual payment gateways, receipt OCR auto-categorization, and time-series spending forecasts on a serverless NestJS microservice architecture.

Recruiter Portal — Talent Acquisition Platform *| React, React Hook Form, Zod, Tiptap, Playwright*

- Built a recruitment platform with candidate search, applicant tracking, map-based location filtering, rich-text job descriptions, and E2E test coverage.

EDUCATION

Master of Computer Applications (MCA) — AI/ML — SRM Institute of Science and Technology *Sep 2025 – Apr 2027*

Minor in Artificial Intelligence — Indian Institute of Technology (IIT) Ropar *Aug 2024 – Sep 2025*

Bachelor of Computer Applications (BCA) — Data Science — Vels Institute of Science, Technology & Advanced Studies (VISTAS) *Aug 2022 – Apr 2025*
